PALLETIZER SERIES 5000

The palletizer series 5000 is designed to meet the latest requirements in term of capacity and maintenance. It is particularly suitable for the building industry to palletize valve bags. Optionally the palletizer series 5000 can be equipped to handle PE and PP bags, FFS or open mouth bags.

Our advantages:

- Capacity
 - up to 5,000 bags/hr
- Maintenance
 - easy machine access
 - the HMI panel supports the operator during maintenance
 - low maintenance cost
- Operational
 - touch screen HMI allows manual operation and the modification of all parameters
 - fully automatic palletizer
